# **GROWING AND LEARNING TOGETHER**

### **It All Adds Up Part 2 – Numeracy Education**

To the Family of a pre-schooler

The Rotary organisation is an international body that is committed to community development and the care and education of its members, the importance of family and extending the life opportunities of people around the world.

The Rotary Club of Daylesford is part of this group and we have recently developed the “Growing and Learning Together” Pamphlet 2 so we can put these beliefs into practice in our own community.

Since April 2004 through our Growing and Learning Together Part 1 project we have distributed over 300 books and Parent Pamphlets to new born babies in our community. Now we take pleasure in presenting you and your four year old child with our Growing and Learning Together Part 2 package.

We hope that the pamphlet will be a useful resource and that your child will enjoy playing with the piece of Mathematics equipment or book that we have presented to her/him.

We also hope that this initiative will contribute to the development of a lifelong love of mathematics and in some small way encourage your child to take risks as a learner and “have a go” at things when they are not sure.

We wish you well!

Yours sincerely

President Victor Szwed and members of the Rotary Club of Daylesford.
